SOMOSTEL BJ64 PD 240W & 27W Folding Bracket Fast Charging Cable - The Ultimate Multi-Functional Charging Solution

The SOMOSTEL BJ64 PD 240W & 27W Folding Bracket Fast Charging Cable is more than just a charging cable; it's an all-in-one solution designed to revolutionize how you power and interact with your devices. This innovative fast charging cable combines ultra-fast power delivery, a built-in adjustable phone stand, and a durable braided design, making it perfect for gamers, content viewers, and everyday users alike.

At the heart of this 240W fast charging cable is its incredible power delivery capability. Supporting PD 240W output for Type-C devices and 27W output for Lightning devices, this fast charging cable ensures your smartphones, tablets, and laptops charge in record time. In just 25 minutes, the BJ64 cable can charge a device up to 85%, far outpacing ordinary cables that only reach 40% in the same time. Whether you're charging a flagship smartphone or a high-performance laptop, this 240W fast charging cable delivers smooth, uninterrupted power.

One of the standout features of this charging cable is its built-in folding bracket. The integrated phone stand allows for multi-angle adjustment, letting you prop your device horizontally or vertically while it charges. This means you can watch TV shows, attend video calls, or play games hands-free, all while your device powers up. Unlike standard cables that force you to hold your phone or prop it awkwardly, this folding bracket charging cable turns your charging session into a comfortable, hands-free experience.

The BJ64 fast charging cable also boasts a user-friendly 90-degree elbow design. This thoughtful feature eliminates hand cramping, making it ideal for gamers who hold their phones while playing. The right-angle bend keeps the cable out of the way, so you won't have to adjust your grip or worry about the cable blocking your view. Plus, the high-density braided jacket ensures exceptional durability, withstanding over 10,000 bends without fraying or damage. This makes the cable resistant to tangling and tearing, ensuring long-lasting performance even with daily use.

Safety is paramount with this fast charging cable. Built with an intelligent smart chip, the BJ64 cable offers multiple protection features, including over-voltage, over-current, and over-temperature protection. This ensures safe, fast charging without damaging your device, giving you peace of mind every time you plug in. Additionally, the cable supports data transfer speeds of up to 480Mbps, allowing you to transfer 1GB files in just 25 seconds, making file synchronization quick and efficient.

Compatible with a wide range of devices, this 240W fast charging cable works seamlessly with both Type-C and Lightning interfaces. Whether you have the latest iPhone, an Android smartphone, or a USB-C laptop, the BJ64 cable has you covered. With its combination of ultra-fast charging, hands-free viewing, and rugged durability, the SOMOSTEL BJ64 PD 240W & 27W Folding Bracket Fast Charging Cable is the ultimate companion for anyone seeking a reliable, multi-functional charging solution.
