

Description	Specification
Product Name	Kubota Construction Machinery
Product Type	Construction Equipment
Brand	Kubota
Equipment Range	Compact excavators, mini excavators, wheel loaders and other construction equipment
Engine Type	Kubota diesel engine, model dependent
Engine Power	Model dependent
Operating Weight	Model dependent
Drive System	Hydraulic / crawler or wheeled drive, depending on equipment
Hydraulic System	Hydraulic operating system with auxiliary functions
Attachments	Buckets, breakers, augers and other attachments, according to model
Control System	Hydraulic/electronic controls, model dependent
Fuel Type	Diesel
Packing	1 machine per export shipment unit
Protection	Protective film, covers and corrosion protection for exposed components
Shipping Preparation	Boom, attachments and removable components secured or packed separately where required
Base	Heavy-duty wooden skid or steel support where necessary
Securing Method	Chains, straps, blocking and lashing to prevent movement
Transport	Flat-rack, open-top container, Ro-Ro or suitable heavy-equipment transport
Storage	Dry, covered area protected from rain, moisture and excessive dust
Container Loading	Quantity depends on exact machine model, dimensions, attachments and transport method
Documentation	Commercial invoice, packing list, certificate of origin, machinery documents and applicable export/import documentation
